<b>1  Agreed actions from last meeting</b>
<ul style="list-style-type: none"><li>• Review past research in area</li><li>• 4-week timeline</li></ul>
<b>2   What I've done since the last meeting</b>
<ul style="list-style-type: none"><li>• Created 4-week Gantt chart to map out project</li><li>• Read over past research papers – info on differences between leagues, differences between genders</li><li>• Created data frame with players VFL stats, their AFL stats if played, and other info like age, height and position</li><li>• Compared VFL stats for those selected vs not selected for AFL</li><li>• Basic logistic regression of VFL stats, age, height on probability of being selected AFL</li></ul>
<b>3   Questions/Problems to be discussed</b>
<p>Missing data – some players don't have height/age data, do I just remove observations?</p> <ul style="list-style-type: none"><li>• For the clustering wanted data on positions but this is only available for AFL players not VFL</li></ul>
<b>4   Feedback (If applicable)</b>
